

INSTRUCTIONS

Hazard a Guess (HaG) printed kits have been designed to assist young workers who are unable to access the Internet. This kit will assist you in taking the guess work out of workplace safety.

Pre and post evaluations have been developed to assist all participants in keeping track of their progress and learning. Before participants commence HaG you should complete the pre-evaluation quiz. Keep track of your score and on completion of all four categories complete the post-evaluation quiz to see if you have improved your skills about workplace safety.

Hazard a Guess printed version has been divided into four topics:

1. workplace environment
2. personal protective equipment
3. manual handling
4. slips trips and falls

In each topic there are four categories - \$100, \$200, \$300 and \$400. You will work through each topic reviewing and answering questions relating to different scenarios that you are faced with. Your aim is to win the maximum amount of virtual money for that topic. A scoring sheet has been provided at the beginning of every topic where you can track your answers and total prize money.

As you are working through *Hazard a Guess* you make decisions on which path to take. You do not have to review every page. If there are no instructions on which page to go to simply go to the next page.

\$100, \$200 and \$300 categories are a variety of scenarios and questions relating to different workplace situations. \$400 categories are a series of multiple choice questions. The number of questions you get correct will determine your virtual prize.

When you successfully complete the four topics you obtain a certificate. This certificate is in the kit. Simply take it out of your kit and write your name on it. To order additional certificates please contact our Publications Hotline on 1300 799 003 and quote catalogue number WC02107. Additional certificates and score sheets may be downloaded from youngworkers.com.au

At the back of your kit is a resources section. These resources have been provided to assist you with workplace safety and provide you with advice or to answer questions. Alternatively call 13 10 50 for free advice.

To order more kits specific to your industry please contact our Publications Hotline on 1300 799 003 and quote the respective catalogue number for the industry you require (these can be found in the Introduction).

Enjoy the learning experience and good luck!
